

Credit Analyst Internship

Standard Chartered Virtual Job Simulation & Corporate Credit Assessment

 Mohd Izyan Bumlajiwala

 Class: 2CSE18

 IILM College Greater Noida

 Standard Chartered / Forage

 September 2026

Internship Overview

Program Architecture

Completed an intensive Virtual Job Simulation with Standard Chartered's Banking & Coverage division via Forage, evaluating corporate creditworthiness and debt capacity.

Primary Objectives

Execution of a real-world annual credit review for a corporate client, integrating financial ratio modeling, industry risk profiling, and structured credit recommendations.

Standard Chartered – Institutional Context

Standard Chartered's **Banking & Coverage** division serves global commercial and corporate clients through robust risk management and sustainable financing solutions.

-  **Risk Governance:** Stringent quantitative and qualitative evaluation metrics for corporate lending.
-  **Sustainable Finance:** Pioneer in financing green technology, sustainability transitions, and ESG-aligned projects.
-  **Credit Excellence:** Focus on maintaining high asset quality through rigorous annual client credit reviews.

Target Client Overview

Green Solutions Manufacturing Ltd.

Market-leading manufacturer of sustainable drinkware, including high-grade reusable water bottles and insulated coffee cups.

Financing Objective: The client requested expanded credit facilities to fund capital expenditure for eco-friendly manufacturing automation and global supply expansion.

IONAL CO.,LTD.

Green Business: Sustainable Thailand

Core Analysis Workflow

Financial Health Analysis

Audited historical balance sheets, income statements, and cash flows to assess debt service ability, liquidity, and operational margin stability.

Industry Research

Analyzed macroeconomic trends, raw material cost volatility, consumer demand for eco-products, and competitive intensity in sustainable packaging.

Credit Structuring

Formulated credit risk mitigants, loan pricing strategy, and protective financial covenants to present to senior credit officers.

Quantitative Ratio Evaluation

Metric / Financial Ratio	Client Performance	SC Industry Benchmark	Credit Risk Assessment
Debt-to-Equity (D/E) Ratio	1.25x	< 1.50x	✔ Satisfactory
Interest Coverage Ratio	4.20x	> 3.00x	✔ Strong Capacity
Current Ratio (Liquidity)	1.65x	> 1.30x	✔ Healthy Liquidity
EBITDA Margin	21.5%	18.0%	✔ Outperforming

Financial Health vs Industry Average

The client exhibits robust debt coverage and profit margins exceeding sector averages, justifying a favorable credit approval recommendation.

Industry Research & Market Dynamics

-  **Sustainable Consumer Demand:** Rapid global pivot towards zero-waste packaging drives double-digit compound annual growth rate (CAGR) in sustainable drinkware.
-  **Regulatory Tailwinds:** Tightening governmental mandates on single-use plastics create strong multi-year commercial demand anchors.
-  **Supply Chain Resilience:** Diversified raw material sourcing minimizes vulnerability to stainless steel and silicone price swings.
-  **Competitive Moat:** Strong brand equity and proprietary eco-design patents protect market share from low-cost entrants.

Credit Approval & Key Covenants

4.2x

Interest Coverage

Ensures ample cash flow cushion for debt service

Credit Recommendation & Conditions

- ✓ **Approved Facility:** Term Debt Loan for green CAPEX expansion.
- 🔒 **Financial Covenants:** Maintain minimum Interest Coverage ratio of 3.0x and maximum D/E ratio of 1.5x.
- 🌱 **ESG Pricing Mechanism:** Margin discount linked to verifiable reduction in carbon intensity.

Key Competencies Developed

1

Accounting Fundamentals

Deconstructing complex multi-year financial statement items.

2

Quantitative Modeling

Ratio analysis, leverage tracking, and liquidity stress testing.

3

Risk Identification

Qualitative sector research & ESG risk profiling.

4

Credit Reporting

Synthesizing insights for credit committee presentations.

Academic & Professional Value

"Participating in Standard Chartered's credit simulation provided practical execution of financial theory—bridging classroom corporate finance with real-world institutional credit risk management."
